

GOT DNA?

VOLUNTEER FOR

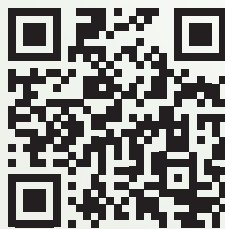

DNA DAY 2022!

National DNA Day is a unique day when students and teachers can learn more about genetics and genomics! This day commemorates the completion of the Human Genome Project in April 2003 and the discovery of the DNA double helix in 1953. This year, DNA Day will be celebrated on Monday, April 25th.

Members of the CWRU community may visit Cleveland public middle and high school classes, and demonstrate a strawberry DNA extraction experiment with the students. This is also an opportunity to discuss your work/research and career paths in science!

Sign up to volunteer for DNA Day by Monday, April 4, 2022
